Skills

- **Frameworks & Libraries:** Laravel, ORM (Eloquent)
- **Security & Authentication:** Auth/JWT
- **Backend:** Express.js (RESTful APIs), MongoDB, MySQL, RDBMS
- **Frontend:** HTML, CSS, Bootstrap (Well-known), JavaScript (Limited working proficiency)
- **Tools:** Git, VS Code, cPanel
- **Soft Skills:** Strong communication

Experience

February 2024 — Present

Koncept Solutions, Rawalpindi — *Laravel Developer*

- Worked primarily on API development using Laravel, contributing to the creation of secure and efficient APIs for various projects.
- Developed Node.js APIs using Express.js for a web-based admin dashboard, enhancing the system's functionality.
- Collaborated with cross-functional teams to integrate APIs seamlessly with frontend applications.

August 2023 — February 2024

ePatronus IT Solutions, Islamabad — *Laravel Developer*

- Developed and maintained web-based projects using Laravel, ensuring optimal performance and scalability.
- Collaborated with other developers and designers to deliver user-centered solutions.
- Applied best practices in coding and documentation to improve the quality and maintainability of projects.

July 2022 — June 2023

Alright Tech, Rawalpindi — *Laravel Developer*

- Collaborated on a web-based project using Laravel, focusing on building and maintaining the content management system (CMS).
- Contributed to the development of APIs, gaining experience in RESTful API design and implementation.
- Worked closely with senior developers, gaining valuable insights into Laravel development best practices.
- Optimized database queries and schema design for MySQL to improve application efficiency.

Projects

- **Doctor-Patient Management System(ddf)**
 - Developed a web-based dashboard and created APIs for a mobile application, enabling efficient management of doctor and patient interactions.
 - Utilized Laravel for back-end development, ensuring seamless integration with the mobile app and secure data handling.

- **Online Clothing Store (Haya-Inspiration)**
 - Created an online store web application for clothing sales, focusing on a user-friendly interface and smooth e-commerce functionality.
 - Used Laravel to handle back-end operations and implemented secure payment processing
- **Professional Hostel Management System (e-hostels)**
 - Developed a comprehensive hostel management system from scratch using Laravel, streamlining hostel operations and providing a user-friendly experience.
 - Designed and implemented features such as room booking, tenant management, and billing.
 - Also design frontend using bootstrap template.
- **Financial Investment Management System (Visionir)**
 - Designed and developed a system to manage financial investments, ensuring secure and efficient data handling using Laravel.
- **Driving School Management System(**
 - Developed APIs for a Driving School Management System using Express.js and TypeScript.
 - Created endpoints for managing students, instructors, lessons, and scheduling to streamline driving school operations.
 - Ensured robust error handling and validation for reliable and secure API interactions.
- **UPVC Software**
 - Created APIs for UPVC software that allows for the design of windows, doors, and panels.
 - Developed functionality to calculate total expenses and generate quotations based on design specifications.
 - Utilized Laravel to ensure efficient and reliable API performance for design, calculation, and quotation processes.

Education

2020–2024

Arid Agriculture University, Rawalpindi— BS(CS)
